

## PRESS RELEASE

### **Completion construction work Praktijkschool Vijverberg Arnhem**

On July 12<sup>th</sup> the construction work of the praktijkschool Vijverberg in Arnhem (NL) has been completed. The new educational building is designed by Royal Haskoning Architects.

The board of Quadraam educational group, which the praktijkschool is a part of, spoke positive about the building as a “remarkable and special design” Besides that the building is a good example of the sustainable ambitions of Quadraam. The new school has a compact shape and is made of natural materials. The large glass surfaces make the building transparent but are protected from the sun by the higher part of the building. The client also invested in a hot and cold water storage for sustainable heating and cooling. Sufficient ventilation and transparency in the interior provides a healthy indoor climate and a bright and synoptic teaching environment.

The pupils will be welcomed at the new building on September 8<sup>th</sup>

Besides Architecture, Royal Haskoning also made the structural design and building services.
